

Use technology to:

- **Increase access** — Reach subject matter experts for “just-in-time” training.
- **Broaden instructional options** — Standards based programs and collaborations from around the world offer innovative, relevant, and motivational experiences.
- **Save time** — Reduce travel time and time spent away from the classroom.
- **Save money** — Reduce the expense of travel.

About CILC

The Center for Interactive Learning and Collaboration (CILC) supports and advances learning through videoconferencing and other collaborative technologies. A non-profit, CILC offers access to quality professional development and student educational content, as well as consulting services. This helps schools leverage technology to improve educational outcomes, while saving time and money.

Take advantage of special discounts on select content provider programs and receive advance notice of CILC Spotlight Sessions and special events.

Education Consulting Services

Using videoconferencing to enhance learning — for the novice to the expert

www.cilc.org

CILC consulting services offer individual workshops and consulting packages to help you learn about best practice implementation models and maximize your investment in technology.

Individual Workshops

Implementation workshops introduce the basics of videoconferencing. Then integration workshops go deeper, helping you integrate technology to deliver and enhance your curriculum. Problem based learning options focus on authentic, community-based learning. For more information, please visit www.cilc.org/c/consulting/k12_education.aspx.

Implementation Workshops

- Videoconferencing Content: Programs for Learning and Collaboration
- Discover the Possibilities of Videoconferencing and Other Collaborative Technologies: A Discipline-Specific Approach
- Videoconferencing and Differentiated Instruction
- Adapting Presentations for Videoconferencing Technologies

Integration Workshops

- Interdisciplinary Instruction: Where Does Technology Fit In?
- Engaging and Differentiating through Videoconferencing and Collaborative Technologies
- Creating a Collaborative Community

Problem Based Learning Workshops

- Utilizing Technology to Create Problem Based Instruction
- Building Collaborative Community Around Authentic Issues
- Developing Inquiry Skills and Research Savvy Students with Technology
- Assessment: Assessing Student Work in a Collaborative Classroom
- Presenting and Sharing Results
- Real Audiences for Real Student Work

Professional Development Packages

Videoconferencing and You

Classrooms are evolving. Teaching techniques are changing. Technology provides critical tools that encourage student learning in today's world. This package meets the needs of beginners and re-engages educators in videoconferencing.

Discover how videoconferencing can support teaching and learning. This powerful technology allows student-to-student collaboration, access to standards based content, and opportunities for interaction with outside experts.

Educators can take advantage of low-cost and convenient professional development opportunities via webinars and videoconferencing. Learn how these tools can help you meet current school improvement goals.

School Package includes:

- 3 hours of coaching and support consultation
- 3 workshops (see offerings at left)
- 10 programs, your choice of k–12 student or professional development programs listed on www.cilc.org (up to \$1,500 value)
